## Founder's Note

I am the founder of **IamLinguist**, and my journey with the German language began in 2017. Over the years, I have developed a strong command over German grammar, structure, and linguistic nuances, with special emphasis on **clear and accurate pronunciation**, enriched through learning directly from a **native German teacher**.

My professional experience at global multinational companies such as **AXA** and **Amazon** helped me grow exponentially in communication and real-world language usage. I founded IamLinguist to help students learn German correctly, confidently, and with purpose—opening doors to global education and career opportunities.

### A2 – Elementary Level

At the A2 level, learners develop greater confidence in daily communication. They can talk about routines, past experiences, and common situations, allowing them to manage everyday life independently in German.

### B1 – Intermediate Level

The B1 level marks a significant achievement, where learners become independent speakers. They can express opinions, write formal emails, understand regular conversations, and use German effectively for work, study, and daily life.

### B2 – Upper Intermediate Level

The B2 level prepares learners for professional and academic success. Students achieve fluent communication, understand complex topics, participate in discussions, and produce clear, structured writing suitable for universities and the workplace.
